PROFESSIONAL SUMMARY

Frontend Developer with about 3 years of hands-on experience building and shipping web applications with Next.js, React and TypeScript. Works independently across the full delivery cycle: implementing Figma designs, building responsive and accessible interfaces, integrating APIs and authentication, and deploying to production. Has delivered e-commerce, booking and admin-dashboard products with SSR/SSG, PWA support and role-based access, as well as offline desktop apps with Electron. An electronics engineering degree and five years in industrial instrumentation add a disciplined, detail-oriented approach to quality and troubleshooting.

SKILLS

Frontend: Next.js (SSR, SSG, CSR), React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, shadcn/ui, Framer Motion, Responsive Design, Accessibility, PWA, i18n (next-intl)

State & Forms: Redux Toolkit, TanStack Query, Zustand, React Hook Form, Zod

Desktop: Electron.js, SQLite

Backend (working knowledge): Node.js, Express.js, Fastify, REST APIs, Prisma, Sequelize, Mongoose, Socket.io

Auth & Databases: Better-Auth, NextAuth, JWT, RBAC; PostgreSQL, MongoDB, MySQL, SQLite

Testing (basic): Vitest, React Testing Library

Tools: Git, GitHub, Vercel, Figma (design-to-code), Postman, Docker

EXPERIENCE

Freelance Frontend Developer | Remote | 2024 – Present

- Build and deploy production web applications with Next.js, React and TypeScript, from requirements to launch: e-commerce, booking and admin dashboards.
- Implement responsive, accessible, pixel-perfect interfaces from Figma designs using Tailwind CSS and shadcn/ui.
- Manage server and client state with TanStack Query, Zustand and Redux Toolkit; validate forms with React Hook Form and Zod.
- Apply SSR, SSG and CSR per page requirements and ship installable PWAs.
- Implement authentication (Better-Auth, NextAuth, JWT), role-based access control and middleware route protection.
- Develop offline Electron desktop apps (React, TypeScript, SQLite) for stores, clinics and restaurants.

Instrumentation Engineer | Zob Ahan Arian Co., Qazvin, Iran | 2019 – 2024

- Installed and maintained industrial instrumentation systems, ensuring accuracy, reliability and safety in plant operations.
- Troubleshot technical faults and coordinated daily with engineers, technicians and project managers.

PROJECTS

Vira Stationery Store | Next.js, TypeScript, Prisma, PostgreSQL, Better-Auth, TanStack Query, Zustand, PWA

- E-commerce platform with customer and admin panels, product management, cart, online payment flow and customer loyalty features.
- Middleware-protected routes and a contact flow that delivers customer messages by email and to the admin dashboard.

Demo: vira-tahrir.ir | **Code:** github.com/alidev-r1996/virashop

Cafe Darchin | Next.js, TypeScript, Prisma, PostgreSQL, Better-Auth, Framer Motion, PWA

- Online menu and table reservation platform with admin and user panels, promotions and live menu updates.
- SSR, SSG and CSR applied per page; delivered as an installable PWA.

Demo: cafe-darchin.ir | **Code:** github.com/alidev-r1996/cafe-resturant

H-Store Clothing Store | Next.js, Prisma, PostgreSQL

- Full-stack clothing e-commerce website.

Demo: hmenswear.ir | **Code:** github.com/alidev-r1996/fashion-style

SoftB | Next.js, TypeScript, Tailwind CSS, shadcn/ui, next-intl, Resend

- Pixel-perfect pages implemented from Figma designs, multilingual support and a contact form using the Resend API.

Demo: softb.co | **Code:** github.com/alidev-r1996/softb

More web projects: Doctor Booking App | Car Rental App | Beauty Salon Booking

Store Management Desktop Apps (Gold, Boutique, Mobile) | React, TypeScript, Electron, SQLite, Zustand, TanStack Query, Zod

- Offline accounting and inventory apps with sales, purchase, return and exchange invoices, automatic profit, wage and tax calculation, installment payments, debt reports, invoice printing and cheque and task reminders.
- Reports on profit and inventory by value and weight (gold) and by category, size and color (boutique, mobile). Also built offline clinic and restaurant management apps.
